

CODEWARS

OVERVIEW:

CSI KJSCE proudly presents the first interdepartmental competitive coding event CODE WARS ver 1.0. It is all about solving coding problems on HackerRank platform in any programming language of your choice.

RULES:

The event will be open on Sundays for 12 hours i.e 11.30 a.m. to 11.30 p.m. Your task is to solve a few questions within this time, taking any number of attempts, all while you're sitting at home. When the contest closes, two rank lists are prepared. First a departmental merit list will be prepared by summing up the scores of all the participants from that department. The second list will consist of the top 5 coders, irrespective of their branch. The lists will be displayed on our Facebook page <https://www.facebook.com/csikjsomaiya/>. The event will have a Warm Up round for practice on 4th September, 2016 (3 simple questions). The actual round will be on 25th of September, 2016 with the finals of the event being conducted on the day of Abhiyantriki. It is not necessary for one to know about competitive coding.

HOW TO USE HackerRank IDE!

- Watch the 5minutes video to get the basics:
<https://www.youtube.com/watch?v=0UqtoGENX8M>
- Sign Up on <https://www.hackerrank.com>
- Time to write your first problem:
<https://www.hackerrank.com/challenges/30helloworld>

HOW TO REGISTER FOR EVENT?

- Register yourself by filling: <https://goo.gl/forms/QxEInUSUQ1DQcP733>
- Now leading you to the gates of your battle arena:
<https://www.hackerrank.com/codewars>

FEW FAQ's:

- Do I need to be CSI member for taking part? NO. All KJSCE students can participate in the contest but only CSI members will be eligible for prizes.
- A Google Form that's it? Do I need to register at the desk too? NO
- When will the scores and results be displayed? On the following Monday of each contest at 1 PM.
- Should I sign up with my Somaiya ID or personal ID? All participants are requested to use their Somaiya ID only.
- How are the contest ranks evaluated? The method is kept discrete on purpose. The authority and final say lies with the Council.

JUDGING CRITERIA:

A participant must make sure his/her code isn't being copied and re-submitted by someone else. Along with the algorithms that detect plagiarism on HackerRank platform, manual checking of the programs for logic, correctness and originality will be carried out by the moderator. Any unfair activity will call for strict action and immediate barring of the participant from the contest for the entire season.
